

## PATIENT QUICK START GUIDE

## **TRIDENT<sup>™</sup> PRO MONITOR**

For clinical support, please contact your medical provider.

For technical support related to your cardiac monitoring device, please call **(971) 250-4237** or email **clearbeatsupport@tzmedical.com**. Include your name and preferred contact method (phone, email, other), and a support representative will respond as soon as possible.

## TRIDENT<sup>TM</sup> PRO

## What you need to know while monitoring...

Avoid fully submerging or exposing device to excessive amounts of water or moisture. The device is water resistant, not waterproof.

Allow sites to dry completely and remove all residue before applying adhesive electrodes.

During prolonged inactivity, your monitor's display screen will hibernate to conserve battery life. Press the circular, tactile power button to wake the display and access the monitoring screen.

If located in an area with poor cellular service, more frequent charging may be necessary to avoid complete battery depletion.

Make sure to connect all electrodes prior to connecting the cable to the device. If tracings do not display correctly, ensure that the colored snap connectors are securely attached to the electrodes and at the proper locations.

Charging the device at a minimum of every 24 hours is recommended to avoid complete depletion of battery life.
